

3 WAYS TO THE ROOF

Bilco®

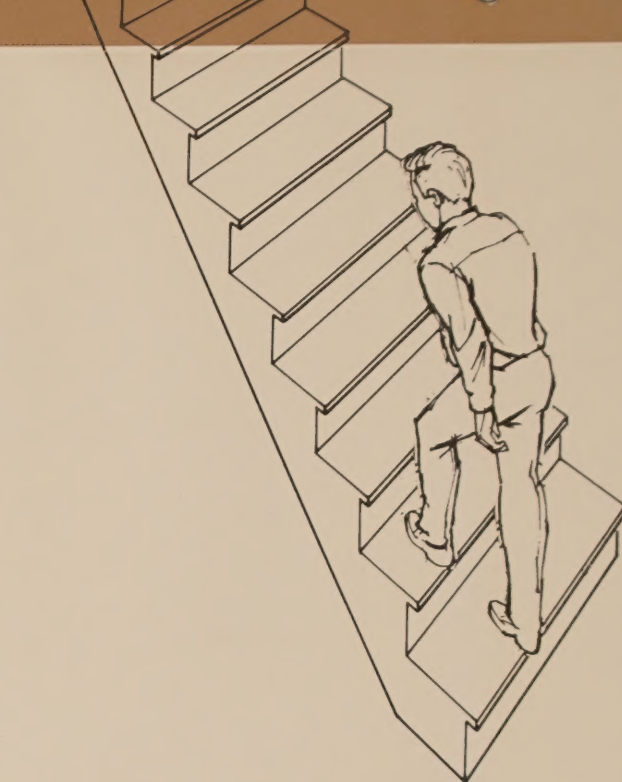

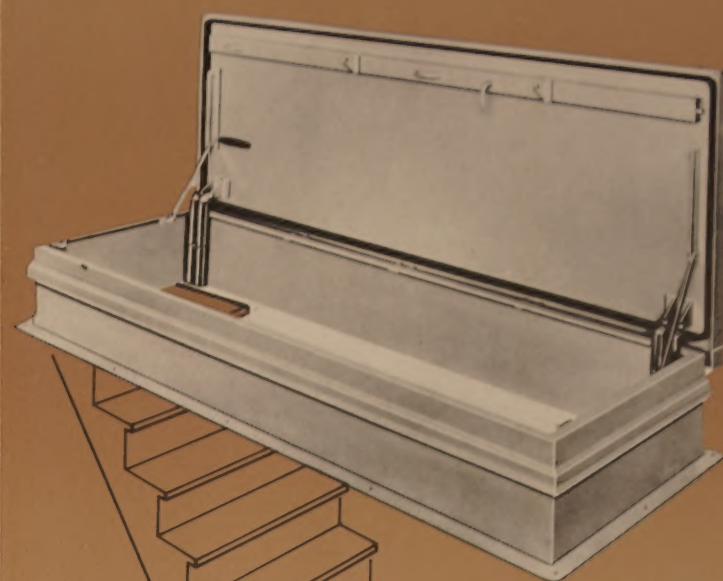

THE FINEST IN
ROOF SCUTTLES

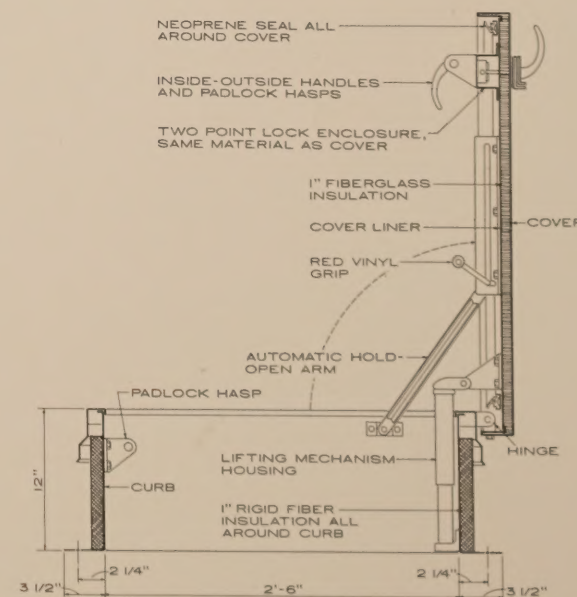

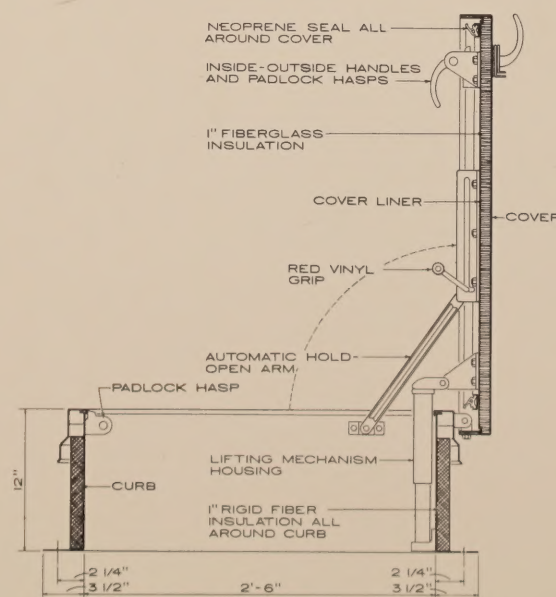

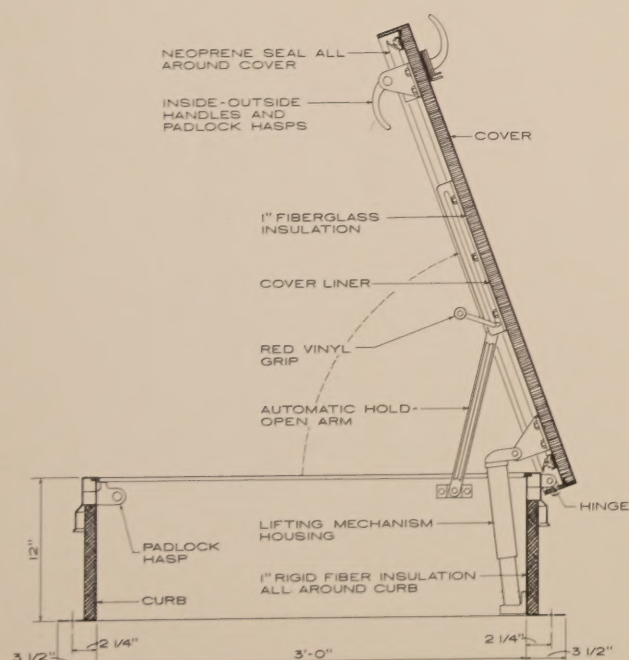

"S" Every building needs at least one ladder access size BILCO roof scuttle. It provides easy, safe, economical access to the roof in all kinds of weather.

"NB" This size BILCO scuttle is ideal for installations where frequent use may be indicated. Permits easier movement of maintenance personnel, tools and equipment.

"L" The ultimate in roof access. This size BILCO scuttle allows a normal stairway. Takes the place of costly penthouse construction. Helps maintain a clean, uncluttered roof line.

In any size, Bilco Roof Scuttles literally "float open" on compression spring operators. Covers automatically lock in open position and cannot be closed until manually released. Bilco Scuttles come in a wide range of standard and special sizes to meet every requirement. Write for complete catalog.
